EXPERIENCE

BreezeEHR, New Orleans — Software Engineer

JULY 2019 - PRESENT

Using Clojure, Datomic, and Kafka Connect to build an electronic health care system tuned for pediatrics and education.

I spend my time designing and implementing projects that span both front-end and back-end. Often these projects require complex data transformations bounded by large sets of validation rules to communicate with various external medical organizations.

Lucid, New Orleans — Senior Engineer

DECEMBER 2016 - JULY 2018

Python, JavaScript, Node.js, Django, Airflow, Kafka, Redis, PostgreSQL, AWS

Scoped, built, and supported six profitable integrations between Lucid and third-party platforms. Promoted to senior engineer for technical leadership of these projects in March 2018.

Worked closely with colleagues in all departments to identify opportunities to accelerate operations with new software.

Organized and implemented three R&D projects that provided real-time cash incentives to online survey respondents.

Grok+Banter, New Orleans — Software Developer

JANUARY 2016 - OCTOBER 2016

JavaScript, Node.js, Hapi.js, RabbitMQ, Docker, Raspberry Pi, OpenCV, DLib

Researched, designed, and implemented a solution to measure the effectiveness of out-of-home advertisements using OpenCV and DLib computer vision frameworks deployed to a Raspberry Pi.

Identified and introduced potential clients to our product at conferences.
